a Brazil's agro-ecological zones

AEZ 6	Year-round humid tropics	5.3 Mha kept
AEZ 5	Humid tropics	1.8 Mha kept
AEZ 4	Sub-humid tropics	0.4 Mha kept
AEZ 3	Moist semi-arid tropics	
AEZ 2	Dry semi-arid tropics	
AEZ 12	Temperate, year-round	0.26 Mha kept

Kept: the clearing the baseline (the EUDR world) makes in five years, 7.8 Mha in all. Zones: GTAP-AEZ, thermal zone × length of growing period, from FAO GAEZ v4.

b Land use at the club equilibrium (flat penalty) relative to the baseline

tropical zones

	AEZ 2 dry semi-arid	AEZ 3 moist semi-arid	AEZ 4 sub-humid	AEZ 5 humid	AEZ 6 year-round humid	AEZ 12 temperate, year-round	**Brazil**
Forest			+378	+1,804	+5,331	+257	+7,770
Pasture (cattle, dairy)	−19	−67	−530	−1,759	−4,516	−254	−7,150
Cropland	+19	+67	+152	−45	−816	−3	−621
