a Brazil's agro-ecological zones

AEZ 6	Year-round humid tropics	2.1 Mha kept
AEZ 5	Humid tropics	4.0 Mha kept
AEZ 4	Sub-humid tropics	1.6 Mha kept
AEZ 3	Moist semi-arid tropics	
AEZ 2	Dry semi-arid tropics	
AEZ 12	Temperate, year-round	0.16 Mha kept

Kept: the clearing the baseline (the EUDR world) makes in five years, 7.8 Mha in all. Zones: GTAP-AEZ, thermal zone × length of growing period, from FAO GAEZ v4.

b Land use at the club equilibrium (flat penalty) relative to the baseline

tropical zones

	AEZ 2 dry semi-arid	AEZ 3 moist semi-arid	AEZ 4 sub-humid	AEZ 5 humid	AEZ 6 year-round humid	AEZ 12 temperate, year-round	**Brazil**
Forest			+1,556	+3,984	+2,067	+162	+7,769
